

1st Annual

Conference Objectives:

- Analyze the efficacy and safety evidence of feeding products in neonatology and its impact on major neonatal morbidity, long term health, and development
- Lung protective effects of exclusive human milk-based nutrition in very preterm infants
- Review current evidence and future nutritional management for infants with congenital heart disease and diaphragmatic hernia
- Understand the strengths and weaknesses of the evidence in support of using probiotics in very low birth weight preterm infants

Thursday, March 25, 2021
